INTRODUCTION

About Employment and Earnings Data

This publication provides employment and payroll information about Alaska and its local areas. Its intent is to assist businesses, nonprofit agencies, governments and the public in assessing the level of economic activity in Alaska. This information provides a framework for analyzing local area economies and is part of a standard method of reporting economic data approved by the U.S. Department of Labor, Bureau of Labor Statistics.

Sources of employment and earnings data include:

- Quarterly employer reports of wages and employment mandated by the State of Alaska's unemployment insurance laws.
- Quarterly federal agency reports made in connection with the state-administered program for unemployed federal workers.
- Supplemental data gathered by Research and Analysis staff to augment the quarterly collection of employment and payroll data.

Wage and salary employment data have been included in this publication as well as its predecessors the *Statistical Quarterly* and *Employment and Earnings Report* since the first quarter of 1964.

Excluded groups

Certain segments of Alaska's employed population are excluded from unemployment insurance coverage, and no ongoing method of collecting employment and payroll information is available for these individuals. Research and Analysis acknowledges the importance of this economic activity, but has no reliable method to augment the data published here. The largest segments of the employed population excluded from these data include:

- Self-employed individuals.
- Fishers.
- Unpaid family help.
- Domestics.
- Most individuals engaged in agriculture.

Industry and area coding

Firm data are classified by industry in conformity with the *Standard Industrial Classification (SIC) Manual*, 1987 edition. The SIC classification system, which is overseen by the Executive Office of the President, Office of Management and Budget, provides for numerical coding of establishments based upon the principal activity conducted. The SIC classification system covers all economic activity and was developed to promote uniformity in the presentation of statistics by federal agencies, state governments and private research organizations.

Area data are published for the twenty-seven census areas defined by the U.S. Department of Commerce. A firm's area designation is based on the firm's last reported work-site address. When employers have establishments located in more than one area, separate employment and payroll reports are obtained for each location in which an employer operates. When this is not possible, employment and earnings are reported in the area of the employer's major activity.

A review of each firm's industry and area code is performed by Research and Analysis on a three-year rotating cycle. Changes to industry or area codes that are noneconomic in nature are incorporated into the data in January of each year. Industry and area code changes determined by Research and Analysis staff to be economically-related occur as of the date of the economic event.

Technical Definitions

ANNUAL AVERAGE MONTHLY EARNINGS: Obtained by dividing "Yearly Earnings" by the sum of monthly employment

INDUSTRIAL CLASSIFICATION: The *Standard Industrial Classification Manual*, 1987 edition, is used to code all establishments.

Abbreviations commonly used due to space constraints are as follows: Ann Av Mo Earn - Annual average monthly earnings; Ann Av Mo Emp - Annual average monthly employment; Bldg. - building(s); CA - Census Area; Emp - Employment; Equip. - Equipment; ex - Except; Insur. - Insurance; Misc. - Miscellaneous; Nec - Not elsewhere classified; Svcs - Services; Trans., Comm., & Util. - Transportation, Communication and Utilities.

NONCLASSIFIABLE ESTABLISHMENTS: Includes firms which cannot be classified in any other industry.

MONTHLY EMPLOYMENT: The number of employees more accurately depicts the number of jobs as opposed to the number of individual workers. It represents the total number of employees during each employer's pay periods which includes the 12th of the month. It is not an unduplicated count of the number of different individuals because workers holding more than one job or who change jobs during the week of the 12th may be reported by more than one employer.

YEARLY EARNINGS: All remuneration paid to workers covering services performed during the year, including commissions, bonuses, and other gratuities when furnished in connection with the job.

Effective July 1, 1996, confidentiality laws were changed to allow formerly nondisclosable employment data to be released. An asterisk (*) is used to avoid disclosure of wage data for individual firms. Yearly totals and averages are calculated using twelve (12) months of employment and four (4) quarters of wages. If sometime during the year a portion was nondisclosable, these figures are not shown.

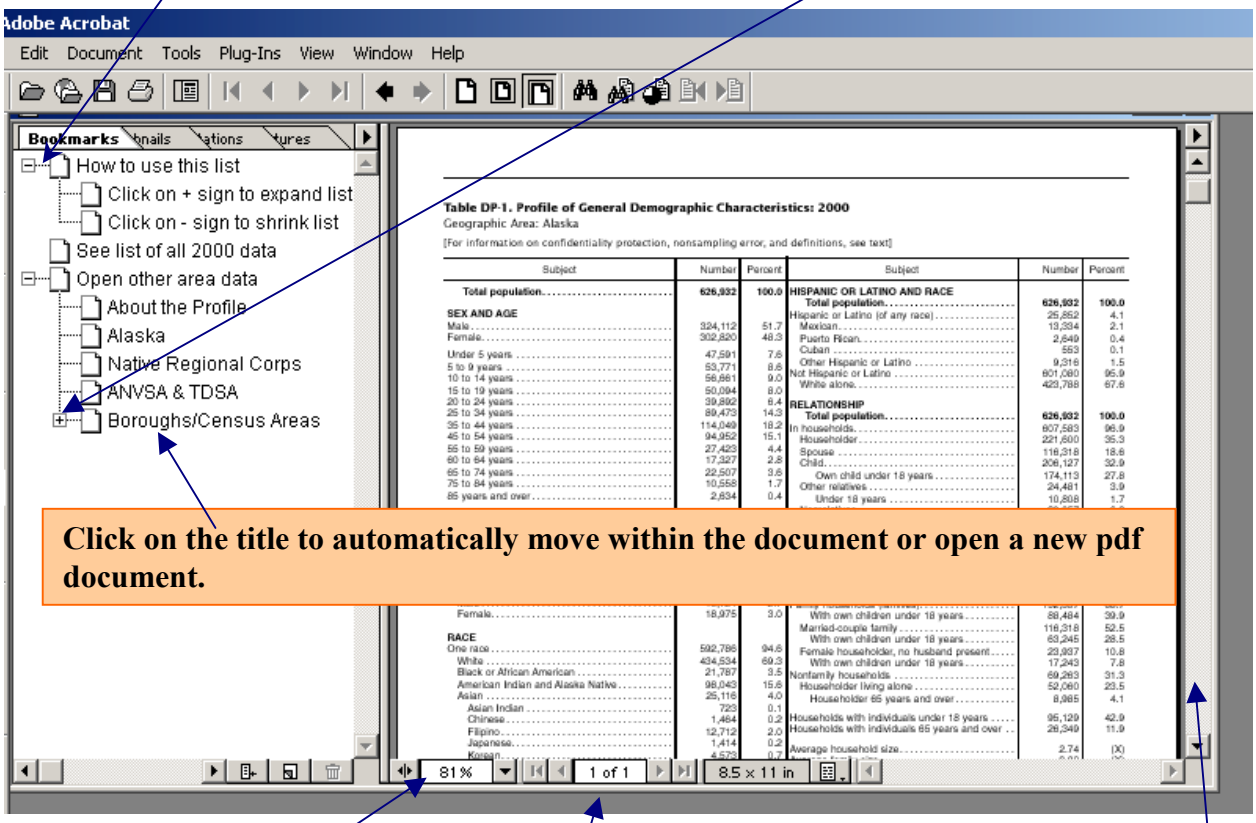
Quick instructions on how to use any PDF document

Click on the (-) sign to shrink the list

Click on the (+) sign to expand the list



Click on the title to automatically move within the document or open a new pdf document.

If you want to increase or decrease the your page view, click here and type in the percentage of your new view.

Try 60-75% to view the complete page.

To go to another page within the document:

1. **use your page down key on the keyboard to scroll through the pages**
2. **click on page number and type new page number**
3. **use the scroll bar at the side**
