GOVERNOR'S COMMITTEE ON EMPLOYMENT AND REHABILITATION OF PEOPLE WITH DISABILITIES

Centennial Hall Juneau, Alaska September 27, 2006

PUBLIC TESTIMONY

19	-oOo-
20	MS. STRATTON: Can I get your name,
21	please, for our record.
22	MS. REIERSON: This is Joy
23	R-e-i-e-r-s-o-n.
24	MS. ELSTAD: Thank you, very much. If
25	you would like to give some testimony, the committee

- 1 is all here and would like to hear your comments.
- 2 MS. REIERSON: Well, basically I don't
- 3 know where I'd be without Voc Rehab. They went far
- 4 beyond what I ever imagined. They bought my hearing
- 5 aids. I went to AVI. We ended up going twice. I had
- 6 a son that was in a bad car accident and they were
- 7 good enough to pay for another, I can't remember, five

- 8 months, and because of that I was able to get a job at
- 9 the Forest Service, and it just one thing led to
- 10 another. Now I'm working for the Marine Highway and I
- believe it all started because Voc Rehab was making
- that commitment to me. And I just am really thankful.
- 13 And it seemed like it was a long road. I think it was
- 14 like seven years, actually. They helped me with one
- 15 thing or another, and I just really appreciate all the
- 16 time and effort they put in to helping me get where I
- am. I never imagined I would be here. And I'm going
- 18 to be 53, and it was a really late start, but it was
- 19 encouraging to know that it's never too late.
- MS. ELSTAD: Great, well thank you, Joy,
- 21 for your comments. We have you down on record now.
- MS. REIERSON: Okay, thank you. Bye.
- MR. BOYNTON: Where was she from, madam
- 24 chair?
- MS. ELSTAD: I believe she was from

- 1 Juneau.
- 2 MS. STRATTON: We've got some public

- 3 testimony we received in written form, and Teri is
- 4 going to read one of them into the record.
- 5 MS. BURKE: Malcolm J. Miller from
- 6 Haida -- a Haida carver, Petersburg, Alaska. A dream
- 7 come true. My birth name is Malcolm J. Miller and I'm
- 8 known to many as J. I am from the Haida descendant
- 9 born and raised -- I'm from the Haida, descendant born
- and raised in Haines, Alaska. My parents passed away
- when I was a young child. I had a yearning to learn
- 12 engraving as a youngster. One of the Native elders
- 13 encouraged me to learn engraving as I stood beside him
- 14 watching him engrave jewelry. As I grew older that
- word of encouragement became my foundation to become a
- 16 Haida engraver.
- In 1988 I suffered a heart attack and
- 18 had bypass surgery in 1993. It was at this time the
- 19 advice of my doctor was to change careers -- on the
- advice of my doctor to change careers. It was
- 21 difficult advice to follow because I had been fishing
- 22 for over 40 years and owned a boat, the JUDY K a
- 23 gillnet troller.
- 24 It was frustrating making a career
- 25 change at my age. I was over 50 years old at the

- 1 time. Fortunately I saved my money from fishing and
- 2 invested in tools, supplies and equipment to practice
- 3 engraving. I attended workshops offered in and out of
- 4 state, paid for my own tuition and used airline miles
- 5 for transportation.
- 6 I sought advice, learning new techniques
- 7 from mentors such as artists Louis Minard, Dave
- 8 Galanin, I hope I'm saying that right, Wayne Price and
- 9 Jon Rowan. They were willing to provide me with
- 10 information on designs, art, use of materials, et
- 11 cetera. I'm indebted to them for sharing their
- thoughts, ideas, hands-on approach and techniques on
- 13 Native Art. The skills I have learned I'm ready to
- pass on and some day I will give someone the
- opportunity to learn. I have been active in teaching
- 16 youths at the high school during the art fair,
- 17 donating jewelry to raise funds for charitable causes.
- I was told you're never too old to

- 19 learn. With that advice it has instilled in me to
- always learn, talk to artists, attend workshops. I'm
- 21 never too old to learn. With my wife Mary's degree in
- business administration and my artistic skill, we
- began the business Dawn Eagle Engraving and I began
- 24 producing jewelry that was profitable. Prior to that
- 25 all my friends were wearing jewelry that I had made

- 1 them, free of charge.
- 2 Petersburg has two very rich cultures.
- 3 Tlingit and Norwegians. I became the first Native
- 4 retailer in Petersburg that produced hand made
- 5 jewelry. My advertising was mostly by word of mouth.
- 6 Customers stopped by to hear Native legend and
- 7 purchased hand-signed jewelry. I was told that was
- 8 the highest of their -- the highlight of their travel.
- 9 I yearned to talk to other artists and
- 10 listen to their suggestions. Then one day I became
- acquainted with Terry McDonald. I met Terry over 30

- 12 years ago as a fisherman. He specialized in
- 13 woodworking media with Native designs. As we became
- 14 reacquainted, and since I had no blood family in this
- 15 area, I adopted Terry into my Haida tribe. We now
- 16 collaborate on Haida designs and are producing
- 17 paddles, game boards. He does the wood carving and I
- 18 engrave on metal media the designs applied to the wood
- 19 carvings. One of our collaborations is on display
- 20 outside Senator Stedman's Juneau office.
- 21 My wife and I moved to Petersburg with
- 22 the idea of opening up a small retail shop and studio.
- 23 We bought a duplex on a commercial lot and used one
- 24 apartment for my work area and retail space. At a
- 25 garage sale we purchased a used rotating jewelry case

- 1 to display bracelets, earrings and pendants. My work
- 2 space and retail area was in the living room section
- 3 of the apartment.
- 4 We began researching and found that

- 5 Tlingit and Haida had a program to assist tribal
- 6 members with disabilities. I began applying for
- 7 grants and they assisted me with tuition and air
- 8 travel for out of state to attend workshops on
- 9 engraving. I also applied for a grant through the
- same agency and received assistance to improve my work
- and sales area. I now a studio where I can work
- 12 comfortably and a retail area so I can display the
- 13 jewelry attractively.
- Sometimes as I burn the midnight oil
- making jewelry I think about how my skills and
- business developed. I am grateful to the Native elder
- 17 for his words of encouragement. To the mentors I came
- in contact with that helped me with the designs. To
- 19 my wife for her insistence and persistence, you can do
- 20 it, you can make jewelry with Native designs, look at
- 21 your skills. To Native organizations that believed in
- 22 me to further my education in engraving. To my
- 23 adopted cousin Terry for developing a rapport that
- 24 continued on to become a valuable friend. To the
- 25 satisfied customers walking away with a piece of my

- 1 jewelry and pleased with the artwork that I have
- 2 learned to develop. My dream has come true. Malcolm

- 3 J. Miller. Haida carver, Petersburg, Alaska.
- 4 MS. ELSTAD: Thank you.
- 5 MS. STRATTON: We have another piece of
- 6 written testimony that is anonymous. Name withheld.
- 7 It's a letter of appreciation to whom it may concern.
- 8 I have been a client of the Division of
- 9 Vocational Rehabilitation since 1990 because I have
- 10 multiple disabilities.
- When I came to DVR seeking assistance I
- was so ill and did not even have the energy and
- 13 motivation to get out of bed. I had to force myself
- 14 to get out of bed and go to the orientation meeting
- 15 that was scheduled for me.
- 16 Although I had years of work experience
- in the accounting field, I lacked self confidence, was
- shy about meeting new people, was offended about being
- 19 criticized and was embarrassed about asking for help
- as a result of my illnesses.

- The Division of Vocational
- 22 Rehabilitation listened to my doctors, they requested
- 23 prescriptions to support their treatment for me. They
- 24 helped me afford treatment for my chronic pain and my
- body and the self confidence I was lacking.

- 1 It has been more than ten years since I
- 2 have worked and my skills are outdated. I need to get
- 3 more up to date training. Now I am able to take
- 4 classes at UAS to upgrade my skills in accounting. My
- 5 DVR counselor advocated for me to receive reasonable
- 6 accommodations while I'm at school.
- When someone is at my age going back to
- 8 work is tough. The services that I have received have
- 9 help me stand up for myself and be confident. I enjoy
- 10 my young classmates. They get me excited and I get to
- 11 make new friends.
- 12 I'm thankful that I have the opportunity
- 13 to be a client of my DVR counselor because she

- 14 understands me so well. I am improving because I have
- been with DVR and the services that I have received
- 16 from DVR have made me realize that I still have hope
- in a place of employment. The staff listens to my
- 18 concerns and tries to help me, too. They never get
- 19 tired of me coming to see my counselor over and over
- again because they always welcome me back with a
- smile. I'm glad DVR is here to help people like me
- 22 who are in need of help to get back to work. If you
- 23 have any questions or concerns, please contact my DVR
- 24 counselor Kay Smith at 465-8930. Sincerely name
- withheld.

- 1 MS. ELSTAD: Would you like to check the
- 2 line. Is there anybody else on line that's joined us
- 3 that would like to provide testimony to the Governor's
- 4 Committee on Employment and Rehabilitation of People
- 5 with Disabilities?
- 6 MR. NODER: I would.

- 7 MS. ELSTAD: Can I have your name,
- 8 please.
- 9 MR. NODER: Sure. My name is Lawrence
- 10 Noder, N-o-d-e-r.
- 11 MS. ELSTAD: Thank you, Lawrence. You
- 12 can go ahead and provide your testimony now.
- 13 MR. NODER: I've been dealing with
- 14 Margie Thompson through the DVR office, and Margie has
- been very helpful to me. I went to her with an idea,
- and Margie put it together along with some other
- people, in consultation with other people, and formed
- a business plan, in the form that the committee would
- 19 understand and approve of. Had it not been for
- 20 Margie's abilities, I wouldn't have been able to do
- 21 that. She has always been responsive to my questions
- and needs and I think that the best way to improve DVR
- 23 is to clone Margie. And I can't really think of
- 24 anything else to say other than the fact that I owe
- 25 her an enormous amount. We are quite a ways along in

- 1 the completion of my grant, and if it hadn't been for
- 2 Margie, I'd still be standing on the sidewalk with my
- 3 fingers -- with my hands in my pockets whistling.
- 4 Margie is a super person.
- 5 And I thank the whole department for
- 6 what they have done in my benefit. I'm sorry I didn't
- 7 have opportunity to write this out, and that there are
- 8 so many ums and ahs and all that, but I'm sure you're
- 9 getting the message.
- MS. STRATTON: We are getting the
- 11 message and we appreciate your time and effort to call
- 12 in.
- MR. NODER: Well, it's something that I
- can do for Margie because she's done so much for me.
- 15 I'm very grateful to her, and the rest of the
- department as well. So I guess that's all I have to
- 17 say.
- MS. STRATTON: Thank you.
- MR. NODER: You're welcome, bye now.
- MS. STRATTON: Nancy Brown, would you
- 21 like to come up front.
- 22 MS BROWN: Well, I'm Nancy Brown. And

- 23 it's hard for anybody to succeed in the workplace, and
- 24 it's especially hard if you're deaf, like me. So I
- 25 have a long standing relationship with Voc Rehab that

- 1 goes back to when my hearing deteriorated to the point
- 2 where I couldn't work anymore. I had to give up my
- 3 job as a news reporter, and Vocational Rehab helped
- 4 retrain me and then they hired me where I worked for
- 5 five years as a vocational rehab assistant. They had
- 6 faith in me and they gave me the chance to get that
- 7 experience, despite my hearing impairment.
- 8 Well, just last March I received a
- 9 cochlear implant which changed my life, and Voc Rehab
- 10 came into the picture and helped me finance that.
- 11 That's a very expensive procedure which I would not be
- 12 able to do on my own. So I have a lot of deep
- 13 appreciation for Vocational Rehab that they helped me
- so much in my life, that I wouldn't be in the
- workplace, I would be a dropout. It's a life saver

- 16 for people, and I thank Vocational Rehab for helping
- 17 me stay in the workplace.
- MS. STRATTON: We don't have anybody
- 19 else right now, so we'll just wait and see if someone
- 20 else comes to give testimony.
- 21 MS. REDAHL: I was here to give
- 22 testimony, actually. I'm Kathleen Redahl (ph) and I'm
- 23 a vocational rehab client from Ketchikan, Alaska. I
- 24 was -- I had a severe injury in my back, I was laid up
- and not able to walk for quite some time. I just had

- 1 a surgery when my husband died unexpectedly leaving me
- 2 with not many places to turn to. I had decided
- 3 because my previous work experience had all been
- 4 physical labor, that I had to change my life and that
- 5 I would attend college and get a degree so that I
- 6 could work with my mind instead of my back for a
- 7 while.
- 8 Encouragement is hard to find. People

- 9 kind of get used to you being where you are, and I got
- 10 a lot of encouragement to stay disabled and very
- 11 little to improve my life.
- 12 I found the workers at Vocational
- 13 Rehabilitation to be amazingly encouraging. They
- believed in me. They told me I could overcome my
- 15 difficulties in pain, that I could make something of
- my life and take care of my child. It was a very long
- process, and I needed all the encouragement I could
- 18 get.
- 19 Alice Rocke in particular was quite
- 20 supportive. She knew things about me that I was
- 21 shocked that she paid that much attention to me. I
- 22 would come in the office and she would say, I see you
- 23 made the dean's list, or, I see that you're now on
- 24 student government, things that weren't case related
- 25 that showed that she had a personal interest in me.

- 2 A happy worker without the encouragement and support
- 3 of DVR.
- 4 I really didn't want a handout, I wanted
- 5 a hand up. It really makes a difference to be able to
- 6 earn your own money, to make your own way through
- 7 life, and this division is so essential to the
- 8 self-esteem of people, not just the economic benefits
- 9 of having people work and not receiving money, but for
- 10 the individual growth and for the community at large.
- 11 I'm very appreciative, and I'm glad to be able to come
- in and speak my heart today. Thank you.
- MS. STRATTON: Do we have someone on
- 14 line who joined us for public testimony?
- MR. LYBARGER: Yes.
- MS. STRATTON: Could you give us your
- 17 name.
- MR. LYBARGER: Charles, the last name is
- 19 L-y-b-a-r-g-e-r, Lybarger. My name is Charles
- 20 Lybarger, and I'm a 48-year-old long time Alaskan
- 21 married with one grown child. I've spent about 25
- years in construction, the last 15 years as a cabinet
- 23 maker with most of that time spent right here in
- 24 Juneau. I took great pride over the years

- 1 and extremely high quality of work, unfortunately I
- 2 developed a chronic job-related repetitive injury in
- 3 both arms which progressed to the point where I
- 4 realized that I soon could no longer work in my chosen
- 5 profession. I was forced to look for a different
- 6 occupation which would not require the heavy
- 7 hand-related physical labor, but where I could
- 8 continue to provide a high standard of service and
- 9 bring in a reasonable income.
- 10 After exploring many different
- possibilities and seeking a lot of service -- a lot of
- 12 advice, I'm sorry, I chose to retrain for employment
- in the information technologies field, specifically as
- 14 a network administrator. I managed to get through the
- 15 first two years of schooling on my own while
- 16 continuing in the cabinet trade. At that point,
- 17 however, I lost my ability to bring in an income as

- 18 the injuries had progressed to the extent that I was
- 19 forced to permanently resign from my old trade.
- 20 My doctor restricted me to sedentary
- 21 work level, a job class for which I had no experience
- or training to offer, at least until I could finish
- 23 school. Although I had filed for workman's
- 24 compensation, the product of an insurance company
- 25 retained by my employers for workers' compensation

- 1 coverage, was not cooperating.
- 2 My wife also has a long-term disability
- 3 which prevents her from maintaining consistent
- 4 employment. And we soon found ourselves with very
- 5 little to live on, much less continue my retraining.
- 6 I either had to find some outside assistance or drop
- 7 out of school, at least temporarily. The catch was I
- 8 needed the schooling to qualify for a reasonable job
- 9 placement. At that juncture my advisor at UAS
- 10 recommended I contact DVR. I did so, went through the

- orientation and set up an initial appointment. After
- 12 review of my situation I was found eligible for
- 13 assistance and reemployment plan was developed around
- 14 my continuing education.
- Financial assistance through DVR enabled
- 16 me to continue with my schooling through the end of my
- 17 junior year. It took 11 long months, but my workman's
- 18 compensation insurer agreed to pay for my last year at
- 19 UAS.
- To bring things up to date, I've just
- 21 recently finished a very successful and encouraging
- 22 three month summer internship with the department of
- 23 management information systems at the city and borough
- of Juneau. I'm currently enrolled full time at UAS
- and plan to graduate next May with a Bachelor's degree

- 1 in information systems. I have excellent grades.
- 2 I now have some references and work
- 3 experiences related to my new occupation and job

- 4 prospects as well that look very promising. The
- 5 bottom line in this current context is that the staff
- 6 at the Division of Vocational Rehabilitation were able
- 7 and willing to provide the level of assistance I
- 8 needed right when it was most crucial, that I receive
- 9 it.
- 10 It is very humbling to have to ask for
- aid, but they made it a very positive experience.
- 12 Warmest regards, Charles Lybarger. Dated today,
- 13 9/27/06.
- 14 MS. STRATTON: Thank you very much.
- MR. LYBARGER: You're very welcome.
- MS. STRATTON: Jim Swanson.
- MR. SWANSON: Hello, my name is Jim
- 18 Swanson, I'm here in Juneau, I work at the Juneau
- 19 branch office with the Division of Vocational
- 20 Rehabilitation. I'm just here to say thank you for
- 21 having me work for Alice Rocke, totally appreciate
- 22 that. She has always been a role model, a great
- 23 co-worker to me, and I had the utmost respect for her
- in the work that she's done for all the individuals
- with disabilities.

- 1 She worked very hard up to about a week
- 2 before she passed away, and everything she did was for
- 3 the people that she worked with. So thank you again
- 4 for the award that you guys have done in memory of
- 5 Alice. Thanks.
- 6 MS. STRATTON: We have some more,
- 7 additional written testimony.
- 8 MS. BURKE: Dated September 25th, 2006.
- 9 To the Governor's Committee on Employment and
- 10 Rehabilitation of People with Disabilities from Monica
- Brandner, president. I'm not sure what she's
- president of, I think it's president of Image by M.
- 13 Brandner.
- 14 First of all, I must apologize that I
- will be unable to attend the public testimony in
- 16 person. I must start off by acknowledging the
- 17 following people who were instrumental in my
- 18 retraining. Mr. Jim Swanson, Mr. Danny Lakip, Ms. Lin
- 19 Davis, and Ms. Linda Miller, employment counselor, for

- 20 her encouragement and beautiful smile every time I
- 21 came to Vocational Rehabilitation for meetings.
- It is because of your retraining program
- 23 that I am able to pursue a career path that I thought
- 24 I would never be able to obtain. The financial
- assistance you so graciously gave enabled me to

- 1 receive my certification in the image and etiquette
- 2 industry.
- 3 I not only received financial
- 4 assistance, but encouragement and a "we believe in
- 5 you" attitude. I have been so impressed with the
- 6 Juneau Job Center network staff and Alaska Department
- 7 of Labor staff. They are caring, considerate and
- 8 compassionate. These attributes were a much needed
- 9 anchor during what could have been a tumultuous time
- in my life. You're a life ring not only to me but to
- 11 my entire family.
- 12 Thank you Juneau Job Center for

- believing in me, for keeping me on track, and most of
- all for allowing me to chase my dreams and make them a
- 15 reality. My promise to you is that with my retraining
- 16 I will impact the building blocks of kindness and
- 17 respect to Alaskan's children and youth. I'm
- 18 committed to our children and will do whatever I can
- 19 to impact their lives and do whatever I can to be a
- 20 positive influence to their lives. Your investment in
- 21 me has given me the opportunity to invest in others
- and I am so grateful.
- Thank you from the bottom of my heart,
- 24 it has truly been a pleasure working with all of you.
- 25 Monica Brandner.

- 1 How come I don't get any applause?
- 2 MS. ELSTAD: Is there anyone else who
- 3 has joined us on line that would like to testify? Not
- 4 yet.
- 5 MS. STRATTON: Okay, we've got another

- 6 individual who would like to give us some testimony.
- ABBY FOCHT: Yeah, my name is Abby, and
- 8 I first started seeking services from DVR December of
- 9 last year. I was in a relatively new employment
- 10 situation that was turning out to be a little more --
- 11 a little over my head, a little more challenging than
- 12 I thought it would be. And I had the additional
- challenge of a brain injury that I sustained in my car
- wreck in '99 and a very challenging supervisor to work
- 15 for, and things weren't going well at all and I
- 16 couldn't -- I'm not the kind of person that would -- I
- believe in myself in terms of just making things work
- out and stuff, but I realized that I needed help with
- 19 the situation.
- And so then I went to DVR and sought
- 21 services for finding something, a new employment
- situation that would be suitable and less challenging.
- 23 So I started working with Vanessa Stevenson over at
- 24 DVR and she quickly got me a contact with Liza
- 25 Paramore, and that began my involvement with them, and

1 it was very rewarding and very helpful.

- 2 Liza did a profile for me in terms of
- 3 what I was good at and interests and stuff, and it
- 4 really helped boost my confidence in terms for that
- 5 kind of stuff, because I'd been brought down by my
- 6 previous employment situation that I was coming out of
- 7 and making me feel better, too, in regards to my
- 8 abilities in relation to the injury.
- 9 So we -- yeah, I went out there almost
- 10 every day and I had got help on my resume and redoing
- that and that was really good, highlighted things,
- 12 highlighted my skills, things I was good at and just
- put it in a better format, and just come to apply for
- 14 jobs.
- I went after state jobs since I
- previously had one, and a large health history, so
- 17 health insurance was important to me. So I really
- 18 stuck to that to getting a state job. And, yeah, it
- 19 was great, too, because with DVR they identified
- 20 services that I needed, that I didn't necessarily
- 21 think that I needed, but turned out I did, such as

- 22 counseling and, you know, help with like Liza, here,
- 23 someone to talk to and to get going with certain
- 24 things. And counseling, I think I mentioned.
- 25 And counseling kind of turned another

- 1 corner for me, which is something I'm still doing,
- 2 which has just changed my life for the better. And
- 3 the counselor that I was seeing recommended this
- 4 biofeedback for me, and I've had multiple head
- 5 injuries in my life, and this biofeedback is a
- 6 treatment I'm still doing twice a week, and that's
- 7 just revolutionized things in the way I function and
- 8 the way I think and just life in general.
- 9 Yeah, so it's been a wonderful
- 10 experience working with DVR, working with DVR. They
- 11 were with me the whole way and checked in with me
- before closing my case and making sure that things
- were stable and stuff and very supportive of my
- 14 interest and endeavors, including some I haven't

- pursued yet with the possibility of going back to
- school, because my car wreck happened when I was in
- 17 the middle of college and I haven't been able to
- 18 finish since. So yeah, very supportive with me the
- 19 whole way, and I know they will be. So very good
- 20 experience. And very helpful and provided all the
- 21 services that I needed.
- MS. STRATTON: Thank you, we appreciate
- 23 your time and effort to come.
- 24 MS. DIEBELS-PARAMORE: Well, you know
- 25 what, Abby has been so lovely to come in and tell what

- 1 worked well with her at DVR, but she failed to toot
- 2 her own horn, and she's currently employed full time
- 3 with --
- 4 ABBY FOCHT: Alaska State Archives.
- 5 MS. DIEBELS-PARAMORE: And they are
- 6 delighted having her on their team. We've heard that
- 7 from several different sources, and it's been nice for

- 8 Abby.
- 9 ABBY FOCHT: Live and work downtown,
- walk to work, it's great.
- 11 MS. BURKE: Got your life back.
- 12 ABBY FOCHT: Got kind of a life I've
- 13 never had. There was some growing up in those early
- 14 years that I didn't ask for, and it happened, and now
- 15 I feel like things are in place and balanced enough
- 16 that I can actually relax and enjoy and get on with
- it. So I don't have the challenges and whatnot of
- 18 before. And health had been good. I'm keeping my
- 19 fingers crossed for the past few years. So hopefully
- 20 that remains so. No surgeries or unexpected brain
- 21 tumors.
- MS. ELSTAD: Is there anyone else that
- 23 has joined us on line that would like to testify
- 24 today?
- MS. STRATTON: No one, and it's 5:00 so

- 1 we are adjourned until tomorrow morning at 8:30.
- 2 (Meeting adjourned)
