### Seventeen Native organizations/ corporations make the list

Seventeen of the Top 100 employers are either Native Alaska nonprofit organizations or subsidiaries of one of Alaska's regional Native corporations. (See Exhibit 5.) They employ nearly 18 percent of the *Trends* 100 workforce. The single largest group of these employers are nonprofit health and social services organizations (see discussion on nonprofits). Five of these companies are tied to the oil industry and the others are management service companies. Because this is a listing of individual firms without consideration for partial or full ownership, the regional Native corporations' full impact on the state's labor market is often masked. If the subsidiaries of the regional corporations were combined under the heading of their parent corporations, most regionals would appear on the *Trends* 100 list. Despite this definitional limitation, their representation is significant. The eighth, ninth and tenth largest private sector employers come from this group. The largest firm in this grouping is NANA Management Services, a subsidiary of NANA Inc. It is the eighth largest private sector employer in the state, with 1,227 employees. Chugach Development Corporation and Chugach Support Services are two new additions to the *Trends* 100 list.

### Nonprofits are prominent

Many nonprofits in the state are among Alaska's largest employers. (See Exhibit 6.) In fact, 22 of the *Trends* 100 are nonprofits and they employ nearly a quarter (24 percent) of this workforce. Their representation actually fell by one when the Fairbanks Native Association dropped off the list. Most of these nonprofits provide either health care or a combination of health care and social services. Maniilaq Association, based in Kotzebue, is an example of this combination. A few are also advocacy organizations, others are utility companies, and one is a credit union. Many of these nonprofits rely heavily on public sector revenues to operate.

Health care is the dominant activity among the nonprofits. Some of these employers are the

# Trends 100 by Industry

## 2003 employment (continued)

# 2

largest or second largest in their respective communities. Providence Health System Alaska, for example, is the largest private sector employer in the state and Anchorage. Other examples include the Norton Sound Health Corporation (Kotzebue), Bristol Bay Health Corporation (Dillingham), Yukon Kuskokwim Health Corporation (Bethel), Banner Health (Fairbanks) and Valley Hospital (Mat-Su Borough). One of the reasons the health care industry looms so large is because it is labor-intensive, providing around-the-clock and year-around service.

### Only half of the top ten made the list a decade later

Only five of this year's ten largest employers have maintained their place on this select list over the past decade. (See Exhibit 7.) These five are Providence Health System Alaska, Safeway Stores/Carrs, Fred Meyer, Alaska Airlines, and BP Exploration. The rearrangement that has removed some companies from the top ten and replaced them with others reflects some of the changes that have taken place in Alaska's economy over the past decade. For example, ten years ago there were only two retailers in the top ten and today there are three. Wal-Mart did not even appear on the *Trends* 100 list ten years ago. Native corporations/organizations have made an impressive entrance into the top ten, from none in 1993 to three last year—NANA Management Services, Yukon-Kuskowim Health Corporation and ASRC Energy Services. In 1993, Providence was the only health care company and now there are two more: Banner Health and the Yukon-Kuskokwim Health Corporation. The only company no longer to be found on the *Trends* 100 list is Mark Air, which closed its doors in 1995. Alaska Airlines' movement from tenth place to fifth may be explained by the growth in the visitor industry and industry consolidation.

### Trends 100 employers are big and the pay is good

Alaska's 100 largest employers employ 63,579 wage and salary workers or 29 percent of all private sector wage and salary employment. In 2003, they paid \$2.9 billion in wages. The

The Alaska Club	603
-----------------	-----

average annual wage paid by the *Trends 100* was \$45,286 compared to \$36,315 for the entire private sector or \$42,252 for the public sector. The strong presence of the oil industry with its high wages explains much of this group's higher average wage. The average wage for oil industry jobs among the *Trends 100* employers was \$92,857. Approximately 11 percent of employment for the state's biggest employers was oil industry related, whereas the oil industry represented only a little less than 4 percent of the entire private sector workforce.

The payroll impact of these employers varies dramatically and often has little relationship with the size of the workforce. For example, there are employers among the top ten whose payroll is smaller than some of those ranked in the seventies for employment.

### **Trends 100 oil industry employers are many**

Oil industry employers tend to be large, and therefore, unlike any other industry, most of them are on this list. (See Exhibit 2.) In 2003, over 83 percent of all oil industry employees were working for one of the state's largest private sector employers. In 2003, these companies employed 6,760 workers. As a capital-intensive industry, it generally favors both large producer and service companies. This trend is not expected to change.

### **Many retailers are on the list**

In 2003, the state's retailers employed nearly 22 percent of all *Trends 100* workers, providing the second largest piece of this employment pie. The number of retailers did not change in 2003 but some of the players did. The newest addition is Lowe's, a result of a new store opening in Anchorage in late 2002. One big loss was Kmart, which closed all of its Alaska stores in 2003. Retail's impact on payroll is significantly smaller than its employment numbers. Lower wages and a preponderance of part-time employment reduce retailers' contribution to payroll. Although retail

## Alaska Native Corporations/Organizations 5

Fully or partly own and/or operate 17 Trends 100 firms

employment represents a large share of the *Trends* 100 workforce, the largest employers account for barely 41 percent of overall retail employment. In 2003 there were more than 2,400 other retailers in the state that did not make this list but account for most of the jobs in the industry.

### Manufacturing is now represented only by seafood

Manufacturing is one of Alaska's smaller industries, employing five percent of the state's private wage and salary workforce and six percent of the *Trends* 100 workforce. For the first time ever, all of the listed manufacturing firms are seafood-processing companies. Silver Bay Logging was the last timber firm to make the list in 2001 and employment at the Agruim fertilizer plant in Nikiski shrank slightly in 2003, causing it to fall off the *Trends* 100 list. Seafood's representation fell by one with the closure of Wards Cove facilities in several locations.

### Top 100 employers can be found around the state

Although the majority of the Top 100 employers are headquartered or have their largest work site in Anchorage, their employees are literally spread throughout the state. Every one of the top ten employers has employees outside of Anchorage, and very few on the full list have employees exclusively in Anchorage. One company that represents this geographic dispersal well is First National Bank Alaska, which is headquartered in Anchorage but has banks in 15 communities around the state.

### Top Ten employers change when the public sector is added

When the public sector is included, ranking among the state's largest employers changes dramatically. (See Exhibit 8.) Only four private sector employers would place in the "Top Ten", Providence Health System Alaska, Safeway/Carrs, Wal-Mart/Sam's

Club and Fred Meyer. This should be no surprise since 27 percent of the state's workforce is employed by the public sector, organizations which tend to be large. Therefore, the public sector including the federal government, state government, school districts and the Municipality of Anchorage head this list.

## Many of Alaska's top employers are Fortune 500 companies

Over a quarter (29) of Alaska's largest employers also share the company of the nation's Fortune 500 companies. (See Exhibit 9). They range from Costco to Wells Fargo and ConocoPhillips to Blockbuster.

# 9 The Fortune 500 More than a quarter of Trends 100 firms are on this list

## Alaska has establishments of all shapes and sizes, but small firms predominate

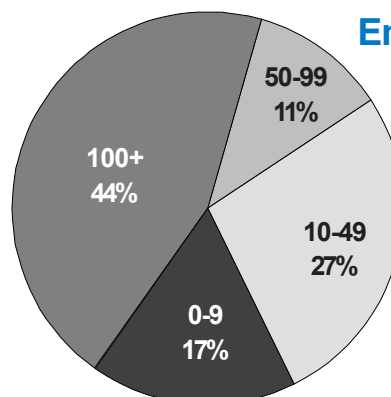

### Employers by Firm Size, 2003

**M**ost of the 16,141 private businesses in Alaska are small. Nearly 77 percent of employers had fewer than ten employees in 2003. Yet, 44 percent of Alaska's 217,243 workers (annual average employment) were employed in large businesses with 100 or more employees. These large firms also paid a disproportionate percentage of total earnings, more than 50 percent in 2003. (See Exhibit 1.)

Firm size can play a role in the characteristics of jobs. Large establishments offer greater occupational mobility and potential for career advancement, whereas small establishments provide their workers with broader experience by requiring them to assume a wider range of duties and responsibilities. Small establishments are distributed throughout Alaska; every locality has small businesses. Large establishments are less common but play a more prominent role in the economies of the areas in which they are located.

### Employment by Firm Size

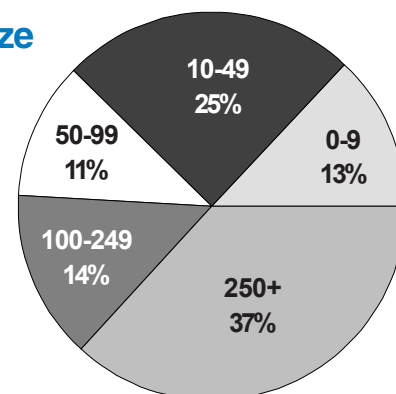

### Firm size varies by industry

While small firms were the largest category of employers across all industries, the size of businesses varied widely by industry. Each industry has a unique combination of occupations, production techniques, inputs and outputs, and business characteristics that determine firm size.

In 2003 the highest concentration of small firms (firms with fewer than 10 employees) was found in the broad Other Services sector (84.7%), Real

Estate and Rental, (83.1%) Professional and Technical (83.0%) and Construction (82.8%) sectors of Alaska's economy. The Mining, Utilities and Information sectors had the highest percentages of large firms (12.5%, 8.5% and 5.5% respectively), reflecting the business characteristics of the Oil and Gas, Electric Power Generation, and Telecommunications industry subsectors. (See Exhibit 2.)

Employment data were extracted from the Alaska Department of Labor and Workforce Development's Quarterly Employment and Earnings Reports database. Firms subject to unemployment insurance laws must file a quarterly report showing their employment during the pay period that includes the 12 <sup>th</sup> of each month in the quarter. The self-employed, unpaid family workers, domestics and most persons engaged in agriculture (including most seafood harvesters) are excluded from this employment database. # Less Growth in May

**Fishermen factor in fuel prices, fish prices before faring forth**

## Alaska Employment Scene

by  
Brigitta Windisch-Cole  
Economist

**M**ay's employment report for Alaska remained positive: the state's unemployment rate dropped to 7.1 percent from April's 7.3 percent, (see Exhibit 5) and the number of unemployed Alaskans was 1,100 lower than a year ago in May. Employment estimates showed an increase of 1,500 jobs over the year ago level that translated to a growth rate of one half percent. (See Exhibit 2.) In previous months of 2004 the annual growth rate varied between 1.3 and 2.1 percent. May's growth rate does not necessarily point to a slowdown in Alaska's economy. It may simply indicate a slight delay in seasonal hiring which precedes full summer employment.

May is often considered a mobilization month when many dormant work sites of the fishing and visitor industries resume activity. The construction industry usually powers up its workforce as well. Between April and May, Alaska's labor market added 11,000 jobs, most of them in seasonal industries. Except for state government, other industries showed little change. The near 1,000 drop in state jobs was partially driven by the semester break at the University system.

### Regional performance was mixed

The Anchorage/Mat-Su region had the highest annual growth rate in the state. (See Exhibit 1.) Construction, retail, and health care industries have helped Southcentral Alaska's economy the most. The Gulf Coast region got a big boost from the seafood industry as it posted higher employment levels than a year ago. Retail also made strong contributions. The Interior region

that includes Fairbanks has benefited from construction and the expansion of retail. In the Southwest region the slump in employment is related to seasonal reductions in the seafood industry. In the Northern region the economy is largely driven by the oil industry and the lack of development has led to a loss of jobs in a variety of oil support industries. Economic growth in the Southeast region has declined; year-to-date employment figures showed a slight downward trend compared to the first five months of 2003. Timber and its related industries have struggled for several years and will suffer additional losses when Silver Bay Logging closes its Wrangell sawmill in October. While most of the region's private sector is enjoying over the year growth, Southeast has experienced a reduction in state government employment.

### Commercial fishing revolves around herring in spring

Late March marks the start of the sac roe herring fishery that starts in Southeast and usually ends in early June in Norton Sound. This year, the first herring fishery in Sitka lasted for less than two hours and fishermen scooped up nearly 5,200 (short) tons of fish. In two subsequent openings the Southeast fleet caught an additional 5,500 tons for a total catch slightly exceeding the local quota. Kodiak's herring fishery in April and May resulted in a 3,220 ton harvest. The state's largest herring fishery, Togiak, yielded nearly

*(continued on page 18)*

### Anchorage Mat-Su Region Leads employment growth May '03–May '04

### 2003 Benchmark

Comparisons with previous year's numbers are of very limited use because of the magnitude of year-end revisions. The official definition of unemployment currently in place excludes anyone who has not made an active attempt to find work in the four-week period up to and including the week that includes the 12th of the reference month. Due to the scarcity of employment opportunities in rural Alaska, many individuals do not meet the official definition of unemployed because they have not conducted an active job search.

Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section

(continued from page 15)

19,000 tons of fish in May, about 75 percent of the quota. Fewer boats than normal were fishing. Low harvest prices and high fuel costs discouraged the herring fleet from the large Togiak fishery. A lack of buyers deterred fishermen in the Norton Sound fishery.

The fuel cost and harvest price differential lie behind particularly fierce competition in the fast-paced Southeast fishery. Prices for Sitka herring were rumored to be about four times the advance price offered in Togiak. Herring fishermen tried to make large sets to avoid traveling elsewhere. Normally, fishermen holding multiple herring permits sequentially fish different areas, and fishermen from all over the state travel long distances to Togiak.

## The first salmon harvest kicks in with high marks

The Copper River fishery, the first wild salmon season of the year, started on a high note, yielding premium prices, about \$6.30 per pound of king salmon and \$4.25 for sockeye. The reputation of Copper River salmon has spread and fresh product is marketed from coast to coast. Salmon prices typically fall when big catches are landed in other areas. Although the salmon forecast predicts an even better harvest than last year, fish prices and fuel costs will determine whether fishermen have a successful season.

The seafood processing industry continues to consolidate. Trident Seafoods, the largest processor in the state, has purchased NorQuest Seafoods, the eighth largest. This purchase enlarges Trident's presence in several Alaska locations and makes it the sole buyer of Chignik salmon.

# Employer Resources

Employers and employees need to know the law regarding fair wages and hours. The Wage and Hour Administration provides information on several laws dealing with the payment of wages to workers (wage claims, prevailing wage, minimum wage and overtime). Programs administered by Wage and Hour include: Minimum Wage and Overtime, Child Labor Enforcement, Prevailing Wage Enforcement, Employment Preference Enforcement, Licensing Employment Agencies, and Alaska Family Leave Act. Go to: <http://www.labor.state.ak.us/employer/employer.htm> and click on Wage and Hour.

The screenshot shows a Microsoft Internet Explorer browser window displaying the 'Links for Employers' page. The page header includes the 'LABOR.STATE.AK.US State of Alaska' logo and a 'Jobs Alaska' banner. Navigation tabs for 'Job Seekers', 'Workers', 'Employers', 'Researchers', 'Department Shortcuts', and 'Search' are visible. The date 'Mon, May 12, 2003' is shown. The main content area is titled 'Links for Employers' and is divided into two columns. The left column contains 'Department Links' and 'State Links'. The right column contains a list of 24 links related to employer resources.
